

NATIONAL

MAGLAB

Style Guide

Rules and guidelines to help you get the most out of our brand and logo.

Contact Caroline McNiel at McNiel@magnet.fsu.edu with any questions or concerns regarding this brand.

Official Name vs. Brand Name

The official name of the institution is the National High Magnetic Field Laboratory. There is a version of our new logo that uses our official name.

The brand name of the institution is the National MagLab. Brands can be defined as the name or symbol that identifies an organization. A brand is also the connection that our audiences, from MagLab users to kindergarten students, have with our institution. Our new logo builds on the positive reputation the MagLab has in our community and connects our physical lab to our online presence - the lab's social media accounts all use National MagLab.

Brand Name (Primary) Logo

This will be the main version of the logo used at the National MagLab:

Full Name Logo

This version should be used in formal settings where our full name is appropriate:

Mark

Our mark can be used for audiences that have already seen our logo. For example, if the logo is displayed on the title page of a Powerpoint the following pages can use the mark.

Color Palette

MagLab Violet is the primary color used to represent the lab. MagLab Gray, Red, and Blue can be paired with MagLab Violet, but should never be used on their own.

<p>VIOLET</p> <p>C85 M84 Y0 K6</p> <p>PMS 7672 c</p> <p>R76 G65 B132</p> <p>WEB 4C4184</p>	<p>GRAY</p> <p>C57 M51 Y30 K13</p> <p>PMS Cool Gray 11 c</p> <p>R83 G86 B90</p> <p>WEB 53565A</p>
<p>RED</p> <p>C2 M100 Y85 K6</p> <p>PMS 186 c</p> <p>R227 G24 B55</p> <p>WEB E31837</p>	<p>BLUE</p> <p>C90 M66 Y0 K0</p> <p>PMS 7455</p> <p>R58 G93 B174</p> <p>WEB 3A5DAE</p>

Brand Pattern

The brand pattern can be used to tell more of the MagLab's story of using magnets to explore materials, energy, and life. It supports the logo and can be used to fill empty spaces. Type should not be put on top of the pattern.

Logo Treatments

Our violet and black logo might suit every application. Use these additional treatments of the logo to fit your needs.

Use this version when color printing is not available:

Use this version on black or dark backgrounds:

Use this version on gray backgrounds. Do not use on black:

Using the Logo

Minimum Size

Legibility is crucial. The length of the Primary Logo must not be smaller than 1 inch (2.54 centimeters) or 72 pixels.

The length of the Full Name Logo must not be smaller than 1.25 inches (3.18 centimeters) or 90 pixels.

Clear Zone

There must be adequate empty space around the logo. The space must be greater than or equal to the size of the B in the Primary Logo (use the E for Full Name Logo.)

Do's and Don'ts

Using the logo correctly is easy! Watch out for these common mistakes.

Maintain the correct proportions. Do not stretch or squish the logo. When resizing, pull from the corners, not from the top or sides.

Never add shadows, bevels, or other effects to the logo.

Do not add borders to the logo.

Do not put black text on a gray background, use the version of the logo with white text.

A controlled color palette keeps our brand distinct and recognizable. Do not mix other colors with our palette.

Official Stationery

Our letterhead and logo has been updated. Make sure to add your personal information to the footer. The letterhead template can be found here: [zdrive > Lab-Wide Use > *MagLab Logo Files > Letterhead](#)

If your name and title are too long to fit on one line you can reduce the size of the type. The preferred typeface is Open Sans, which can be downloaded for free here:

www.google.com/fonts/specimen/Open+Sans

Presentations

To better help you prepare Powerpoint presentations we designed a collection of slide designs that fit the MagLab brand. The presentation template can be found here:

zdrive > Lab-Wide Use > *MagLab Logo Files > Powerpoint

Slide Examples

The information you present is important, and we are here to help you communicate effectively Here are some guidelines that will increase the impact of each slide:

1. Each slide should contain no more than three- five major points;
2. Title text should be between 36 and 48 points and body text between 24 and 30;
3. Providing a graphic or other visual will greatly enhance the message points;
4. Use clip art sparingly;
5. Powerpoint slides should be used to supplement the presentation, not replace it.
